Summary

Experienced **Front-End** Developer skilled in **React.js**, **Redux** and **API integration**. Building fast, **responsive**, and user-focused web applications with clean, maintainable code. Passionate about **UI/UX**, performance optimization, and delivering seamless digital experiences through agile teamwork.

Work Experience / Internships

Codveda Technologies – Remote (Chandrapur, Maharashtra, India) Mar 2026 – Present
Frontend Developer Intern

- Built responsive SPA interfaces using HTML5, CSS3, JavaScript, React.js, Tailwind CSS, and Bootstrap with mobile-first design.
- Implemented dynamic UI and REST API integration using DOM manipulation, event-driven JavaScript, and Fetch API.
- Optimized front-end performance and deployed apps using asset compression, lazy loading, and CI/CD on Netlify and Vercel.

DEPI – Cairo Oct 2024 - Jul 2025

Front End Developer

Promoted and developed a full-featured desktop real-time chat application.

- Built a real-time chat application using Socket.IO supporting 5,000+ concurrent users with <150 ms message latency.
- Implemented secure authentication and authorization using JWT with protected routes and role-based access control.
- Developed a responsive front-end with Tailwind CSS and optimized development using Vite and Hot Module Replacement (HMR).

Education

Al Safwa High Institute of Engineering - Cairo, Computer Engineering – Sep 2022-Present

Skills

- **Languages & Technologies**: HTML5, CSS3, JavaScript, Typescript, React.js, Redux, RESTful APIs, state management with Redux, Context API, useReducer.
- **Design & UX**: UI/UX design, responsive and mobile-first interfaces, interactive web animations.
- **Collaboration & Performance**: Git, Agile workflows, cross-browser testing, and performance optimization techniques.

Personal Projects

Portfolio (Demo)
Technologies Used: React JS, Tailwind, Three.js, Typescript

- Expanded a fully responsive personal portfolio with an interactive **3D** hero section and tabbed skill showcase, leading to a **45%** increase in average session duration through enhanced **UI/UX**.
- Highlighted top projects with live demos and GitHub integration, boosting recruiter engagement by **60%** and significantly improving personal brand visibility.

Tatab3ny (Demo)
Technologies Used: React JS, TypeScript, CSS, Supabase, Recharts

- Built a comprehensive personal finance management platform tailored for the MENA region (featuring "Gameeya" and asset tracking), improving users' financial planning efficiency by 40% through a premium, responsive UI.
- Integrated a robust PostgreSQL backend via Supabase and developed interactive dashboards using Recharts, providing real-time data visualization that enhanced budget tracking accuracy by 35%.

CareerSync (Demo)
Technologies Used: React JS, Tailwind CSS, TypeScript, Google Gemini AI, Recharts

- Built a personal finance management platform for the MENA region featuring Gameeya and asset tracking with a responsive UI.
- Integrated a PostgreSQL backend via Supabase and created real-time financial dashboards using Recharts for accurate budget tracking.

Volunteer Experience

Egypt Digital Generations Initiative – Graduation Ceremony– Cairo, Egypt | Dec 2024

- Led a 5-member team to coordinate a graduation event, managing task delegation and overall execution.
- Communicated with participants and organized resources to ensure smooth and timely event coordination.
- Handled unexpected issues during the event, demonstrating adaptability and problem-solving skills.

Awards And Honors

- **Best Project of the Semester Award** – Cairo, Egypt | June 2024
  For innovative design and security in a C++ Bank System project.
- **Certificate of Recognition** – Ministry of Communications, Cairo, Egypt | October 2024
  For leadership as team leader during the Pioneers Egypt Digital Leaders graduation ceremony.
